

DITC MANAGING TRUSTEES:--

Dhableswar Industrial Training Centre Managing Trustees is a direct partner with **NSDC (NATIONAL SKILL DEVELOPMENT CORPORATION)** having a **FIVE STAR** ratings along with high end machineries, smart classrooms, TOT certified trainers, canteen, transportation facilities, hostel facilities etc. At the initial stage three sectors have been identified for the skill training programmers for the local population which will help them to get employment or be an entrepreneur. The three sectors are mainly as follows

- 1- COMPUTERISED NUMERICAL CONTROL TECHNICIAN (AUTOMOTIVE SECTOR)**
- 2- SEWING MACHINE OPERATOR (APPAREL & HOME FURNISHING SECTOR)**
- 3- DATA ENTRY OPERATOR/D.T.P. (INFORMATION TECHNOLOGY SECTOR)**

The admission procedure, training modules, syllabus, mode of teachings and other day to day activities are prescribed by **NSDC**. After the completion of training every candidates have to appear in theory, practical & viva voce examinations. Once the result is announced and certification process is over, the candidate can avail facilities like counseling, campus interviews, rozgar melas etc for career growth.

DITC SKILL CENTRE:--

DITC Skill Centre works under the DITC Managing Trustees with the sole purpose of undertaking short term training courses and a production wing meant for providing technical solution to industries at large. The training centre has been awarded with 5 STAR Ratings by National Skill Development Corporation under the ministry of Skill Development & Entrepreneurship. All training courses are performed under Pradhan Mantri Kaushal Vikash Yojana (PMKVY) flagship scheme of NSDC. The Skill Centre has modern air-conditioned smart class rooms with audio visual facilities along with separate toilets for boys & girls. The workshops are well lit and well equipped with latest machineries along with all the required accessories. The safety equipments have been well placed all over the centre. The entire Skill Centre is CCTV monitored for safety purposes.

Computerized Numerical Control Technician Course:--

A Computerized Numerical Controlled (CNC) machine is automated and run by a computer program used in the engineering industry for cutting metal parts. The CNC machine drill, cut and shape highly precise items that are used in numerous industries such as the automotive and aerospace industries. They greatly increase the number of products that can be produced in a day which is also termed as productivity. The increasing use of CNC machine tools in all sectors of manufacturing industry has increased the demand for computer controlled machine tool operators. There is a need for skilled machine operators, with the manufacturing industry switching over to computer controlled machines with a focus on increasing productivity. This programme for CNC Technician is designed to provide skills required for an individual to become a professional in the manufacturing sector. It covers the following areas.

- **Knowledge requirements:** -- Adequate knowledge of the CNC system, use of CNC machines and other equipments.
- **Application:** -- Hands on training and apply the work in a real environment.
- **Soft skills** :-- For effective communication and conduct.

Self Employed Tailoring / Sewing Machine Operator Course:--

A SET/SMO is an individual skilled in sewing & repairing garments and can make customized Indian dresses. The job role involves taking measurement, cutting fabrics as per measurement and sewing with the help of ordinary sewing machines or production sewing machines. It also involves alteration works of a stitched dress material to correct and fit as per customer requirements. After successful completion of the course a person can either work in a garment stitching factory or can be self employed by becoming an entrepreneur.

Data Entry / Desktop Publishing operator course:--

The course helps an individual to learn identifying computer peripherals, internal components, windows and its related application and software installation process. Trainees will work with MS office package to create word document, practice with excel sheet & power point presentation, edit images and perform file conversion of different formats. They will use internet to search information using browser along with official communication process. The trainee will also achieve data entry in English and regional languages with optimal speed and accuracy.

Environment Safety Initiatives:--

Taking care of environment is not an obligation but a sacred duty. Our environment is our life. Nature is God's most beautiful creation. It felicitates the growth, development and nourishment of all its creatures. The food we eat, the air we breathe, the water we drink and the climate that makes our planet habitable are all nature's gift to every living organism on earth. Despite of all the benefits, we still mistreat our environment for which course correction is required from every individual. With this vision, Cuttack Cement Works has planted trees in & outside of its premises to keep the company & its adjacent areas Clean & Green. The company has worked extensively in this regard with the commitment and initiative like " Each One Plant One".
